Harlan J. Berk, Ltd. has presented an innovation in antiquities and numismatics for some time now. The system is simple. When you want an antiquity or coin in the sale, just bid the estimated price by phone or mail. We will send you the antiquity or coin immediately. No waiting for the closing of the sale. Any and all antiquities or coins not sold before the closing date will be sent to the highest bidder on June 13, 1990.

EXAMPLE—You bid estimate on an item valued at \$100.00 and if your bid is the 1st to reach us, you will receive the item immediately. If on the other hand, you bid \$75.00 on the same item and are still the high bidder at the end of the sale, the item will be mailed to you on the closing date, June 13, 1990.

If you are ever in the area, stop in and see us! Of course, it's best to call first.

SCARABS - Scarabs represent the beetles observed by the Egyptians. Identified with the sun, due to the ray-like horns projecting from their heads, the scarabs rolled their balls of dung with their hind legs while looking east. They also constructed little, pear-shaped structures of dung in which to lay their eggs. These were buried in the earth, in excavated, tomb-like chambers which burst forth with new life upon hatching. The Egyptians, hence believed it capable of the regenerative powers of nature.

Therefore, the beetle became a popular amulet for healing, and application to funerary beliefs. They mimicked the beetle in the building of subterranean chambers in which to house their dead, wrapped to resemble the folded legs, and wings of the pupal stage of the insect's development. Amulets of the scarab were wrapped inside the mummy bandages to enforce the belief that life could spring forth from the underground chamber. Special scarabs revitalized the body after death. Others were protective, warding off disease and evil. Some were commemorative, issued by a pharaoh to describe an event, or provide protection by the gods.

We are proud to present a select group of terracottas. Terra cotta means "fired clay". They were made either by hand, wheel or mold, then incised, baked and painted, if need be. Many were modest objects intended for the home and for religious, votive purposes. Produced "en masse", yet considered artistic, they often represented man's deities, as well as his secular way of life 2000 of more year ago. Many were as aesthetically pleasing to the eye as the more expensive Greek bronzes and marble statues. This holds true today as well. This is a wonderful opportunity to own a great miniature work of Greek art.
